

Upgrading an auto-installed installation

This page concerns phpList self-hosted users only. If you have a registered account at the phpList Hosted service, please contact hosted@phpList.com.

Auto Installer Upgrade.

Providing you have used your web based auto installer (Softaculous/Fantastico) to initially install your phpList, you can simply update it by visiting the installers page and click on the upgrade link. NB: This will only appear when an update is available.
